19th March, 2018

Dear Chair,

Thank you for your response. I have not had time to fully examine its contents yet but it clearly did not give answers to my 2 e-mails.

To help you with this I will explain in more detail:

Back in 2012 when I sent my original letters to Mr Howell, (including the judge's ruling on the Child X Educational Tribunal), I also sent it to the BCA, MCA, UCA, Royal College, ECU, and World Chiropractic Association. It would be hard to say that this was not whistle-blowing. I have all the responses from all parties in my archives with their subsequent responses, etc.

Mr Howell was going to bring up the lack of response to a chiropractic diagnosis which led to a continuation of the abuse by the system by wrong and non-diagnosis of Child X with the GCC. Mr Howell said that he had a Duty of Care. However, in the paperwork that I have finally received there is no evidence that he had. This is probably why he refused to send me the paperwork that I was legally entitled to. His eloquent letter to my solicitor is clear evidence of breach of Freedom of Information Act and Transparency Acts. He was clearly not going to try to advance the profession.

He refused to act when I helped the family to complain about the child's non-diagnosis and referred me to the Ombudsman. The mother won her case and the Council again had been seen to have acted illegally again as seen in the judge's comments from the tribunal, and he even added autism to the child's diagnosis.

Yet if the Regulator had backed my right to make, and if need be defend, my diagnosis as seen in the Chiropractic Act, things would have turned out much better for the child. Dereliction of Duty. My first letter of complaint was after the child's diagnosis was withheld from the Ombudsman, and mine not accepted.

There is something very wrong going on here, and it needs a proper investigation as clearly I am being blocked time and time again whilst trying to get to the bottom of this for a chiropractic patient.

I look forward to your response.

Howard Lamb
