Dear Prime Minister,

I have not received any communication regarding my last letter and your prime minister code. Silence gives consent, the rule of tacit consent used as an indicator of guilt in court i.e. an innocent man would protest to clear their name. This then means that you have aided and abetted others in crime whilst trying to pervert justice. Inaction to rectify the mental and physical health of children with special needs, by removing human rights, against UNCRC guidance is a criminal act. As are ignoring the whistleblower acts, disability, equal opportunities, and transparency laws. An honour system can only work if people are honourable and not in breach of common law, then using their position to cover up their illegal actions, as you seem to have done. An M.P or PM if breaks the law must resign. Why haven't you? Why have the police and IOPC been suppressed as they have clear protocols and procedures on child abuse and have not acted.

I have witnessed the faults in the system and the damage done to children yet at no stage have you or the police asked for this information gathered during my case study. Just a wall of silence and cover up. Political decisions leading to breach of law is still illegal and punishment must fit the crime. If the government wants to rectify this crime against humanity, they need to act, not just hope it goes away. Needing to protect all the former PM's whose watch this happened on will not change the plight of these kids.

Please do the decent thing and resign and start an independent investigation so those responsible can be charged.

Yours sincerely,

Howard Lamb  
DC
